# XN 200 IP Storage Appliance

Store more, access easier, and reduce your TCO

Xtore XN 200 Series, powered by Microsoft® Windows® Storage Server 2003 R2, provides a total solution customers' storage needs – Simple management, data security, high availability, and rapid backup and restoration. With four hot-swappable hard drives support, XN 200 can provide 4TB capacities in this small footprint tower design. XN 200 also can be configured with 3rd party iSCSI target storage.

This server is designed to meet today's storage requirement for small and medium businesses. This unique enclosure allows documents to be shared internally and externally in a more convenient, faster, and secure manner between customers and suppliers. It is an ideal solution for small and medium businesses as well as departments within a corporation.

Through Microsoft's MMC interface, Xtore XN 200 server can be setup within 20 minutes. It has more advanced features than traditional file servers. Multiple file servers can be consolidated as a whole to minimize client license fees.

With powerful Windows® Server 2003 Kernel, third party backup software can be seamlessly integrated into the server.

Backup and restoration tasks become easier and faster by using Volume Snapshot Service to endorse from shadow copies. This will minimize cost per unit as well.

## KEY FEATURES & BENEFITS

### ▲ High Availability

XN 200 is equipped with a server grade motherboard designed for 24/7 usage. This board supports embedded RAID 0, 1, 5 gives users the option to protect valuable data on the fly.

Temperature and critical components are continuously monitored. In case of any event failure, server will automatically trigger the alarm and send email notification as well as log event to users.

### ▲ Consolidation

With heterogeneous platform support, data can be shared among Windows®, Unix/Linux®, Macintosh®, and Netware®, clients with multilingual support. Multiple file servers can be consolidated to reduce system complexity. Consequently, support costs can be significantly reduced. Data is secured by integrated with Windows Active Directory® service. No network change is necessary as the server is deployed.

# XN 200 IP Storage Appliance

## Performance

Coped with high speed networking, gigabit Ethernet ports are build-in as default. By utilizing high performance Intel® Core™ 2 Dual CPU, this system delivers a powerful performance among similar platforms in today's market.

## Lower Total Cost of Ownership

A pre-configured and dedicated server for document sharing is deployed. With Windows® Server 2003 R2 incorporated in this technology, compatibility of existing anti-virus, backup, replication, and resource management will undoubtedly protect your investment.

## Scalability

Supports a scalable solution to manage growing storage needs via efficient expansions. Optional expansion slot allows customer to acquire extra local storage.

## SPECIFICATIONS

<b>Model Number</b>	XN-004-A1
<b>Software</b>	WSS2003 R2 Workgroup Version
<b>Enclosure</b>	Tower w/LAN, HDD LED
<b>Drive interface</b>	SATA 300
<b>Hotswap HDD</b>	Four, with Fail, Activity LEDs
<b>Capacity *</b>	4TB
<b>RAID</b>	Intel RAID 0, 1, 5
<b>Ethernet port</b>	Dual GbE Ports
<b>Processor</b>	Intel® Core™ 2 Duo
<b>Installed Memory</b>	DDR II 1GB
<b>Other I/Os</b>	USB 2.0 x 2, RS-232
<b>Power supply</b>	Single 400W
<b>AC Input</b>	100~240V Auto Switching
<b>Cooling Fan</b>	12cm x 1, 3700 RPM
<b>Dimension(mm)</b>	176(W) x 311(D) x 280(H)
<b>Certification</b>	CUL, FCC, BSMI, VCCI, CE, RoHS compliance

\* Depend on capacity of single drive. 4TB is based on 1TB drive
